

GET TO KNOW YOUR CENTRAL STATION

Dynamark has been in the security industry for over 40 years with a mission to become the most trusted, respected, and recognized name in security. Since 1972, Dynamark has been protecting lives and exceeding its customer's expectations. Our current staff has over 60 years of combined experience in the sales, installation and monitoring of commercial and residential security and fire systems.

TECHNOLOGY

Dynamark Monitoring takes pride in always upgrading and adapting to maintain current trends in security technology. Our systems run on fully redundant, uninterrupted power supply units (UPS) with secure internet connections and dual hybrid IPX phone systems with VOIP and SecureVoice for operators. We are constantly improving our technology to better serve you.

24/7 MONITORING

Dynamark commits to ongoing job-related education by having 100% of its central station operators certified by the TMA online training series, the highest level of training in the industry.

INDUSTRY CERTIFIED

Dynamark's Central Station is an award winning facility with up to date security certifications including the TMA Five Diamond Certification, held by less than 200 central stations in the US.

Dynamark has 100% of its central station operators certified by the TMA Central Station Operator Level 1 training course.

UL requirements cover building structure receiving and monitoring equipment, staffing issues, installation, and ongoing service.

To earn IQ Certification, companies must undergo a rigorous evaluation by the IQ Certification Board, made up of security, law enforcement, fire, state regulatory and insurance industry representatives.

FM Approvals' Central Station Placarding Program provides third-party verification of Code-Compliant Fire Alarm Signaling Systems.
